## Making a Puppet

### My Key Learning

#### What do I already know?

I know that material can be joined using a needle and thread.

I know that I have to design a product before making it.

I know how to evaluate my product and say how to improve it.

When we draw a design idea it is useful to see how an idea will look, we have to plan how we are going to make our hand puppet. A hand puppet is a toy that you can make by putting your hand inside.

We then have to create a template, a stencil which you use to help you draw a shape more easily onto different materials.

We will use a joining technique to connect two pieces of fabric together. We will choose which technique is most suited for making a hand puppet.

There are various techniques for joining fabric;

- Staples
- Glue
- Safety pins

We can decorate, adding details to a design, in different ways

Key Vocabulary	Definition
decorate	To add details to a design to improve its appearance
design	To make, draw or write plans for something
fabric	A natural, man -made, woven or knitted material.
template	A stencil which you use to help you draw a shape more easily on to different materials.
hand puppet	A toy that you can make move by putting your hand inside it.
safety pin	A 'U' shaped pin with a cap where the needle slots in
stencil	A shape that you can draw around
